About Me

I'm a Flutter developer with a background in computer science. I enjoy creating mobile applications that are simple, useful, and smooth to use. Most of my work involves building Android and iOS apps with Flutter, connecting them to Firebase, and managing data through APIs. I like keeping my code clean and organized, making sure every feature works as expected. I've also handled testing, debugging, and improving app performance in real-world projects. Outside of coding, I enjoy learning new tools and exploring better ways to solve problems through technology.

Skills

- Firebase (Authentication, Firestore, Cloud Storage)
- REST API integration
- Git & GitHub (Version control)
- JSON data handling
- Postman for API testing
- State management (Provider, Riverpod, Bloc, GetX)

Certifications

- Foundation on Deep Learning
- Machine Learning
- NCC A, B & C Certificates

Experience

Flutter Developer Intern
Meridian solutions-Calicut   **DEC 2025 –Present**

- Contributed to the development and deployment of a real-time Flutter mobile application, successfully published on the Google Play Store.
- Gained experience on full app lifecycle, Play Store deployment.

Flutter Developer Internship
Maitexa Technologies ,Calicut   **Jun 2025 – Nov 2025**

- Developed cross-platform mobile applications using Flutter with consistent user experience on Android and iOS devices.
- Integrated REST APIs for dynamic content delivery and data synchronization, improving system reliability.
- Implemented Firebase services including Authentication, Firestore, and Cloud Storage to support backend functionalities.
- Applied state management approaches such as Provider, Riverpod, Bloc, and GetX to streamline app performance and maintainability.

Add On Course Assistance Project
Maitexa Technologies Pvt Ltd, Calicut   **Jul 2025 – Aug 2025**

Worked on a mobile application developed to assist college students in managing and accessing add-on courses efficiently.

- Assisted in developing a cross-platform Flutter app providing a smooth experience across Android and iOS devices.
- Integrated Firebase Authentication and Firestore for secure student login and real-time data management.

Education

Master Of science (M.sc) in Computer Science   2023–2025
N.A.M College Kallikkandy

Kannur University

Bachelor of science (B.sc) in Computer Science   2019–2022
N.A.M College Kallikkandy

Kannur University

Projects

Wellness App | Flutter, Firebase

A ai powered fitness tracking and diet management app with real-time chat between trainers and users,
Firebase backend,

X-ray Classification App | TensorFlow, Keras, Tkinter

Built a deep learning model to classify chest X-rays (COVID-19, Pneumonia, Normal)
with 93% accuracy and integrated it into a simple GUI for predictions.
